"Now that The Salon has become a must-see for top collectors and designers, the bar has become very high, challenging us to broaden the fair with new and unexpected material," explains **Jill Bokor**, executive director of The Salon Art + Design. "To meet this challenge, we've taken the best of what we've exhibited in the past and augmented it with some surprises, leading our audience to think differently about how pieces from all periods and genres create outstanding and unique environments."
